Fact About Lupus

Lupus is an inflammatory disease caused when the immune system attacks its own tissues.

Multiple autoimmune diseases, including. Common diseases that overlap with lupus include Celiac disease, Myasthenia gravis, Rheumatoid arthritis etc. **Inflammation** caused by Lupus can affect many areas in body, including kidneys, brain and central nervous, lungs, heart and so on.

6 

People have only a few mild symptoms at the beginning, such as fatigue, rash on skin, dry mouth or eyes, which makes the diagnosis difficult. There is no single test to diagnose lupus. Typically, the combination of blood and urine tests, signs and symptoms, and physical examination findings are used for diagnosis. On average, it takes nearly **6** years for people with lupus to be diagnosed, from the time they first notice their lupus symptoms. **63%** of people with lupus surveyed report being incorrectly diagnosed.

BERRY-BANANA SMOOTHIE

This delicious smoothie is great for lupus patients experiencing fatigue but will also help prevent bone loss and cardiovascular disease.

PREP: 10 minutes

MAKES: 2 servings (about a cup each)

Ingredients:

- 1 cup of low-fat yogurt (any flavor)
- 1/2 cup of round oat cereal (i.e. Cheerios)
- 2 tablespoons ground flax-seed or flax-seed meal
- 1/2 cup fresh strawberry halves or raspberries, or frozen whole strawberries
- 1/2 cup skim milk or vanilla Rice Drink (non-dairy beverage)
- 1/2 banana

Place all ingredients in blender. Cover and blend on high speed 10 seconds; stop blender to scrape sides. Cover and blend about 20 seconds longer or until smooth. Pour mixture into glasses. Serve immediately.
